- Ask an adult to help you push out the holes marked (two each side), ready to thread the elastic.
- Fold the mask in half along the dotted lines.
- Crease along the dotted lines on the bird's forehead.
- Fold the beak in half along the dotted lines.

Blue tit

Blue tits are small and light, and very good acrobats. This helps them hang upside down on the thinnest twigs to look for food.

Although blue tits often come to gardens to feed and nest, they are really woodland birds. Oak trees are their favourite places because they have plenty of caterpillars and other insects to feed to their chicks.
