

Blue tit snapper

You will need:

- scissors
- glue
- pink, yellow and blue colouring pencils
- double-sided tape.

What to do:

- Colour the patch on top of the head blue. Colour the inside of the mouth pink. Colour the thin stripe on the neck yellow. Leave the rest of the snapper white.
- Cut all around the outside of the blue tit snapper.
- Fold the snapper along the dotted lines with the coloured area facing outwards. Make sure you fold across the middle of the mouth too.
- Apply glue as marked. Match A and B glued sections under the head and beak, squeezing to stick in place.
- Inside the top and bottom halves of the beak where circles are marked, stick a little piece of double-sided tape. Put your fingers on the tape and start snapping!

Blue tit

Blue tits produce only one brood of chicks each year, but can have as many as 13 chicks. A pair of blue tits can feed each chick one caterpillar every minute when they are growing up fast in the nest. As soon as the chick has gobbled a caterpillar up, the parent blue tit flies away to find the next one!
