

Kestrel dart

What you need:

- Coloured pencils
- Scissors
- Two straws – one larger than the other
- Sticky tape
- Paper clip

RSPB Wildlife Explorers is the junior membership of the Royal Society for the Protection of Birds.

The Royal Society for the Protection of Birds (RSPB) is a registered charity: England and Wales no 207076, Scotland no SC037654. 350-0024-08-09

How to make your kestrel fly

- First, colour the bird, as suggested on the colouring guide.
- Cut around the outline of the bird and turn it over.
- Cover one end of the large straw with tape and stick it to the back where shown.
- Put the paper clip on the beak.
- Now put the small straw inside the large straw and blow; your kestrel should fly through the air!

Kestrels hover over their prey before swooping down to catch it. They have excellent eyesight and can spot a beetle from 50 metres away!
