

Pied wagtail snapper

You will need:

- Scissors
- Glue
- Grey and pink colouring pencils
- Double-sided tape

What to do:

- Colour all of the small patches around the eyes and on the neck grey. Make the inside of the mouth pink.
- Cut all around the outside of the pied wagtail snapper.
- Fold the snapper along the dotted lines with the coloured area facing outwards. Make sure you fold across the middle of the mouth too.
- Apply glue as marked. Match A and B glued sections under the head and beak, squeezing to stick in place.
- Inside the top and bottom halves of the beak where circles are marked, stick a little piece of double-sided tape. Put your fingers on the tape and start snapping!

Protection of Birds.

Pied wagtail
Pied wagtails are small, black and white birds with long thin tails which they wag up and down. That is why they are called wagtails!
