

# Redwing snapper

## You will need:

- scissors
- glue
- brown, black and yellow colouring pencils
- double-sided tape.

## What to do:

- Colour top of the head and the cheeks dark brown. Colour the stripes above and below the eye very pale yellow. Colour the lower beak and inside the mouth yellow, the rest of the beak brown.
- Cut all around the outside of the snapper.
- Fold the snapper along the dotted lines with the coloured area facing outwards. Make sure you fold across the middle of the mouth too.
- Put glue on the areas marked. Match A and B glued sections under the head and beak, and squeeze until they stick.
- Inside the top and bottom halves of the beak where circles are marked, stick a little piece of double-sided tape. Put your fingers on the tape and start snapping!

Protection of Birds.

**Redwing**  
A redwing has brown wings! It gets its name from a patch of rusty-red underneath the wing and on its side. You can hear redwings after dark on clear nights in October and November: they fly in from Europe and call high, sharp 'seeep' sounds.
