

White-tailed eagle mask

RSPB Wildlife Explorers
is the junior membership
of the Royal Society for
the Protection of Birds.

You will need:

- Scissors
- Sticky tape
- About 50 cm of shirring elastic
- Colouring pens/pencils.

What to do:

- Use the diagram to colour in the mask.
- Carefully cut out your mask and the beak.
- Cut out the two eyes and cut along the two dotted lines below them. Push out the holes for the elastic, marked on each side of the mask. Ask an adult to help you with these.
- Fold the beak up the middle and stick the two flaps over the right letter on the back, A to A and B to B, you can secure these with sticky tape.
- Thread the elastic through the holes in the mask. Ask an adult to fit the mask to your head and tie a knot in each end of the elastic. Stick the elastic in place with sticky tape.

White-tailed eagle

**White-tailed eagles are the biggest bird of prey in the UK.
They usually find a mate when they are about 5 years
old and will stay together for life.**

**These clever birds catch fish by flying low over the
water, hovering when they see something tasty,
then diving down quickly to grab it!**
