

Night-time nature hunt

Nature adventurers don't stop exploring when it gets dark. In fact, exploring when it's dark can be especially exciting. There are new sounds to listen for, different animals to look for, and you may find that even familiar things can seem quite different in the dark. Make sure you use your nose: many flowers smell much stronger at night.

Grab your grown-up, a torch and something warm to wear, it's time for a night-time adventure.

How many of these can you find?

- | | | | |
|--------------------------|------------------------------|--------------------------|---|
| <input type="checkbox"/> | Moon | <input type="checkbox"/> | Night-smelling flower
<small>eg honeysuckle, jasmine, hebe</small> |
| <input type="checkbox"/> | Bat | <input type="checkbox"/> | Snail |
| <input type="checkbox"/> | Owl hooting | <input type="checkbox"/> | Spider |
| <input type="checkbox"/> | Animal rustling
in a tree | <input type="checkbox"/> | Stars |
