Expert advice from the RSPB

Managing land for wildlife is both challenging and rewarding. It requires skill and knowledge of both the wildlife needs and the site-specific circumstances.

To help those creating or managing habitats themselves or advising others, the RSPB has produced a range of informative handbooks.

In a concise and clear format, they help land managers, advisors, planners and policy makers to maximise the benefits of land management in the UK.

A Management Guide for Birds on Lowland Farmland
£19.99
Stock code: 24-261

This handbook describes the causes of farmland bird declines, the requirements of declining species and details of the management of features such as hedgerows, field margins and grasslands for wildlife.

Quantity

The Farm Wildlife Handbook
£19.99
Stock code: 24-287

This companion volume to the above guide covers management to benefit a range of farmland wildlife. Individual chapters on each group enable advisers and managers to plan conservation to integrate the needs of different groups of wildlife.

Quantity

Woodland Management for Birds
£14.95
Stock code: 24-263

This handbook, co-produced by the RSPB and Forestry Commission England, uses current scientific knowledge to provide guidance on measures to benefit declining woodland bird in England that are integrated into wider woodland management.

Quantity

A Practical Guide to the Restoration and Management of Lowland Heathland
£19.95
Stock code: 24-187

This is a key source of detailed information on lowland heathland ecosystems, and the techniques for restoring, maintaining and monitoring them. It addresses management issues affecting dry heath, wet heath, mires and associated grassland and scrub habitats, and uses case studies to illustrate them.

Quantity

Habitat Creation Handbook for the Minerals Industry
£24.99
Stock code: 24-202

This handbook helps to identify the best habitat creation and management opportunities for the various minerals extraction types. It provides detailed information of the techniques needed to ensure successful habitat creation, supported by case studies of actual restorations.

Quantity

The Fen Management Handbook
£10.00
Stock code: 223-076

This handbook is an invaluable reference tool for anyone involved in fen management, creation or restoration. It draws together the latest technical knowledge and understanding, and is generously illustrated with diagrams, pictures and case studies.

Quantity

The Wet Grassland Guide
£14.95
Stock code: 24-115

This guide describes the ecology and best practice management of freshwater grazing marshes, on the coast and in floodplains. It includes discussion on grazing densities and timetables and on ditch management and water control, and uses case studies to demonstrate their application.

Quantity

Rivers & Wildlife Handbook
£19.95
Stock code: 24-041

This handbook provides detail on watercourse best practice management that integrates flood alleviation, wildlife and other uses, illustrated with case studies. It describes how to enhance the wildlife value of engineered drainage channels, and the restoration of important riparian habitats.

Quantity

Reedbed Management for Commercial and Wildlife Interests
£14.95
Stock code: 24-090

The Reedbed Management Handbook describes the integrated management, restoration and creation of reedbeds for wildlife and commercial interests, and illustrates this with case studies of the different management options.
