

# RSPB Snettisham

## Finding your way around

### Access trail

Follow this 0.6 mile (0.9 km) trail to the beach and encounter a landscape steeped in local history, from shingle digging in the Second World War to the devastating floods of 1953. The shingle pits are examples of saline lagoons and contain rare and unusual species.

### Beach trail

First contact with The Wash! This dramatic vista is home to tens of thousands of birds from late summer to spring. During late spring and summer be careful not to disturb the nesting birds on the shingle beach along this 825 yard (0.75 km) trail.

### Loop trail

The 1.3 mile (2 km) trail runs around the southernmost pit past two hides, a temporary viewing structure and the wader watch point. You should always be able to see ducks, geese, gulls and wading birds on the pit, and on certain dates you can witness the world-renowned Snettisham wader spectacular.
