

# BUILD A BIRD

# PERFECT PUFFIN!

Collect all **six issues** of Wild Explorer this year and make this amazing model of a puffin!

## Neck and chest

## STEP-BY-STEP

**1** Fold the white hexagon shape on the neck up towards the black section. Put glue on the white tab and loop the black section round to create a ring.

**2** Fold the vertical lines on the upper chest so it domes out. Fold the horizontal lines so that the triangle tabs stick out above.

**3** Fold the vertical lines on the lower chest so that the chest is domed out. Fold the vertical lines so the triangles above bend down. Don't fold the last two.

**4** Put glue on the front of all of the tabs on the lower chest, except the two little ones at either end. Stick the upper chest on to the tabs on the lower chest.

**5** Put glue onto the front of all the remaining tabs and slide inside the neck. Line up the join in the neck with the middle crease in the chest, so that the stretched hexagon shape is at the back.

**6** Now slide the chest and neck onto the body. Line up the stretched hexagon shape at the back of the neck with the same shape on the body and glue down.

## You will need!

Scissors and glue or sticky tape  
Optional: paper or card as backing, a ruler to help make straight folds.

The most fish ever seen in a puffin's beak in the UK is 62!

# PART THREE

This model will be online soon. Check out our other model at [rspb.org.uk/build-a-bird](http://rspb.org.uk/build-a-bird)

Cut out these pieces and back them with paper or card. Don't cut off any tabs!

I'm nicknamed Sea parrot or the clown of the Sea!
